

CITY OF WYANDOTTE CONSTRUCTION NOTES

1. The Contractor is required to contact the City Engineer, Mark Kowalewski, by email at mkowalewski@wyandottemi.gov a minimum of four (4) weeks prior to the start of construction to schedule a Mandatory pre-construction meeting with the City of Wyandotte. The Contractor employees supervising the construction project and the Utility Owners' representatives are required to attend. Also required for this meeting are:
 - a. Contractors Detailed Construction Schedule showing at minimum the following details
 - i. Order of Construction, Street by Street
 - ii. Duration of Each Task
 - iii. Clearly identified Milestones
 - b. A Contact List showing both the Utility Owner's employees, Contractors Supervisor, Sub-Contractor's and alternate Contractor Supervisor's Names, 24 hour contact phone numbers and email addresses.
2. The Contractor is encouraged to video record the entire construction area. Any Damage to property, any cracked or broken concrete or any disturbed areas whatsoever shall be Prima Facie Evidence that the contractor is at fault and the damage shall be replaced unless the video recording indicates that the condition existed before construction began.
3. Contractor to notify City of Wyandotte Water Department and Engineering Office 48 hours prior to commencement
 - a. City of Wyandotte Water Department: 734-324-7142
 - b. City of Wyandotte Engineering Department: 734-324-4557
4. Contractor shall be required to notify by mail, a minimum of 7 days prior to start of construction activities, any property owner or resident affected by this construction package. Said notification shall include the names and contact information for the Contractors Representatives and the Contractor Supervisors along with a high level schedule of construction activities as it relates to the properties affected.
5. Contractor to field verify all existing utility locations, inverts, and grades prior to commencement on construction. Test holes shall be utilized to locate existing utilities where necessary.
6. A minimum of 18" vertical clearance to be provided above and/or below all existing public utilities. A minimum of 42" horizontal clearance to be provided from the outside edge to outside edge of all existing public utilities.
7. All Work in the right-of-way shall be performed in accordance with MDOT standards and specifications for paving and related work.
8. Excavations below hard surfaces shall be backfilled with MDOT Class II Granular Material in eight inch (8") lifts, compacted to 98% of its maximum unit weight at moisture contact less than saturation.

9. Sidewalk removal shall be accomplished in complete flags. Driveways and Approaches shall be saw cut, full depth, to the nearest joint and removed and replaced. Streets and Curbs shall be saw cut, full depth, and removed as directed by the City of Wyandotte Engineer. All work shall be performed in accordance with the City of Wyandotte specifications.
10. Any replacement of sidewalks at intersections requires the proper placement of ADA ramps and detectable yellow inserts per City of Wyandotte's specifications.
11. Any work that requires the replacement of pavement such as street cuts, driveways, sidewalks or approaches requires a separate permit for each location from the City of Wyandotte Engineering Department. Contractor shall stamp concrete at each address location with identification and date.
12. Any grass areas disturbed shall be restored with a minimum of three inches (3") of quality screened top soil and sod.
13. No Trees, Shrubs, or Bushes shall be removed without prior consent and approved replacement plan
 - a. Any work in the area of any existing Tree, Bush, or Shrub shall maintain a minimum of 36" to its base
 - b. All trees to be bored.
 - c. Any trees, brush or shrubs that are damaged or removed shall be replaced as close as possible to the site that it was removed. Approval of new locations shall be approved by the City Engineer.
14. The Contractor shall schedule Post Construction Walk Through with the City Engineering Department to identify any items needed restoration before project closeout and final inspections.
15. The Contractor shall guarantee and warrantee all construction and related work for a period of five (5) years.
