May 23, 2016

From: City of Wyandotte Department of Engineering and Building

The City of Wyandotte has contracted with Ajax Paving to repair and resurface the following streets as part of the 2016 HMA Resurfacing Program:

Van Alstyne (Elm to Eureka)  
5<sup>th</sup> Street (Eureka to Forest)  
Bondie (Railroad tracks to Biddle Ave)  
Eureka (Van Alstyne – Detroit River) \*Late addition to project\*

The existing asphalt surface will be milled off, areas of concrete base will be saw-cut, removed and repaired, drainage structures repaired or replaced, a new asphalt surface constructed, curbs and crosswalks repaired, and damaged lawns repaired with seed or sod.

The first three streets listed are already under construction. However, the milling of Eureka Road is scheduled to commence Thursday, May 26<sup>th</sup>, 2016. The concrete repairs and asphalt paving will fall into the same schedule as the streets already under construction. Residents may lose access to driveways for short periods of time. Please park vehicles in other locations when contractors are working on your street. Also note that due to limited road width, no on-street parking on Van Alstyne will be permitted through the duration of repairs.

Trash pick-up will continue on the regularly scheduled day.

We apologize for the inconvenience this work may cause you. The City and Ajax Paving will try to limit the inconvenience as best as possible. Your cooperation in this matter will be greatly appreciated. Should you have any questions, kindly contact Jesus Plasencia at 734-324-4558, or by email at [jplasencia@wyan.org](mailto:jplasencia@wyan.org).
